

The top screen displays navigation, time mph, and radio station. Below are controls for the Radio AM/FM and Seek. As well there is a cd tray and eject button. To the sides are speakers and vents. There are three knobs for controlling temperature, the auto and A/C which are displayed on a screen and there is a knob for fan speed. There are 4 buttons for adjusting for the pilot and co-pilot which is to direct the fans and change the circulation. Then there are the pilot controllers which have joysticks to change direction and rotation. On the right there is a button for hazard lights and on the left a scroll wheel to change gears. On the back there are two buttons a trigger which either accelerates or brakes and two side buttons for turn signals
